Roofing Products®

Defining Excellence.™

VISTA™ AR

NEW
for 2017

LEGACY®

Featuring 

NEXGEN™ POLYMER MODIFIED ASPHALT

Sustainable post-consumer polymer modified asphalt technology increases flexibility, granule adhesion, and impact resistance.

RETAIN COLOR GRANULES

Superior granule adhesion provides your roof lasting beauty and protection from damaging solar rays..

THE ZONE®: IMPROVE FASTENER PLACEMENT

The Zone® nailing area dramatically improves correct fastener placement during installation.

PROTECT FROM EXTREME WEATHER

Class 3 impact resistance offers your roof a high rate of protection.

FORMULATED ROOFING SEALANTS

Specially formulated asphalt sealants hold the shingle in place during high winds and rain sealants protect from wind driven rain.

FLEXIBLE IN ALL WEATHER

Asphalt technology provides flexibility for application in a wider range of climates and roof styles.

EXTREME WEATHER PROTECTION

The Legacy® provides a durable barrier against extreme weather, receiving the UL 2218 Class 4 Impact Resistance classification, the highest rating possible.

In a Class 4 rating test, the Legacy® withstood a simulation of hailstones impacting a roof at 90 mph (144 kph) without sustaining damage.

SBS MODIFIED ASPHALT

The rubberizing aspect of SBS increases flexibility and weatherability for your roof. The thermo cycling resilience of SBS modified asphalt provides greater granule adhesion for the shingle to create a better barrier from the elements. When granules stay on the shingles, your roof lasts longer.

RAIN SEAL PROTECTION

Malarkey's Legacy® shingle is manufactured with a double line of defense in the critical area for a laminated shingle, with double SEBS asphalt rain seal protection.

Malarkey SEBS asphalt adhesive is superior to oxidized asphalt because of its cohesive and adhesive properties. The SEBS asphalt has elongation capabilities of up to 800 percent, making it flexible down to zero degrees.

LANDMARK[®] PRO

Landmark Pro is designed specifically for the professional roofing contractor that takes pride in providing more to their customer.

Landmark Pro improves upon the CertainTeed Landmark shingle, a leading consumer publication's "Best Buy" for the past five years.

We started by adding more weathering asphalt to the industry's toughest fiberglass mat to provide more protection. Then we incorporated our Maximum Definition color blend technology to give the product more vibrancy on the roof. Included is the proven performance of our NailTrak feature, enabling faster installation.

Landmark Pro offers the industry's strongest warranty. Protecting your reputation and safeguarding homeowners from manufacturing and aesthetic defects.

Add it all up and what you get is the opportunity to offer a lot of additional value for the money... and today that means more than ever.

Quality & Consistency of Supply:

IKO's control over the shingle manufacturing process and raw material supply, not only provides an unprecedented level of product quality; it also makes IKO a more reliable source of supply. "Do Not Mix" situations are virtually eliminated because IKO's vertical integration and meticulous manufacturing specifications allows them to mix and match shingles produced in any one of our many North American manufacturing plants. This better enables IKO to rely on any of their several North American manufacturing plants to satisfy the needs of any market. While the competition continues to impose their limitations with "do not mix" stickers, IKO has perfected the process so our contractors and distributors can avoid the headaches.
